

DMV ON DEMAND Counter Solutions

With ITI's DMV on Demand software platform, you can meet customers when and where they want to be met while gaining control, security, and real time visibility. For transactions that occur over or behind the counter, ITI's Print on Demand (POD) solution provides an intelligently distributed print system designed specifically for motor vehicle registration and title issuance from your counter or from your mailroom.

INCREASE TRANSACTIONS, CUSTOMER SATISFACTION AND REVENUE

ITI POD understands, optimizes, and integrates all DMV services processed and delivered at or behind your counter to increase transaction speed, customer service, and revenue without requiring additional resources or budget. With real time reporting and auditing through the life of every transaction, it continuously validates completion of every print job and makes any anomalies or fraudulence immediately visible. As part of DMV on Demand, all data is accessed and updated into a single database of all DMV transactions, regardless of when and where they occur. ITI POD mitigates 100% of your inventory waste by centrally managing all inventory through ITI's secure facility in Fort Wayne, Indiana.

Recover at least 1% of revenue through an end-to-end chain of custody that greatly reduces any risk of fraud or theft regardless of where the transaction was initiated.

Increase the speed of every DMV transaction 15% and the number of transactions per location

by automating key service delivery to increase the efficiency and reach of current resources, regardless of attrition or budget status.

Increase customer satisfaction through simplified issuance that allows your staff to successfully service more customers each day.

EXPERIENCE YOU CAN TRUST

ITI leverages over 20 years of experience in 18 states to install, integrate, monitor, support, and manage the inventory associated with counter-based transactions allowing your team to focus on other priorities. Best of all, as part of the DMV on Demand platform, there is no upfront capital outlay; you only pay for what's been delivered and paid for. So, you don't have to find or create new budget.
