

DMV ON DEMAND Fulfillment Solutions

With ITI's DMV on Demand software platform, you can meet customers when and where they want to be met while gaining control, security, and real-time visibility. For offsite processing of License Plates and DMV documents, ITI's Centralized Fulfillment (ITI CF) solution manages all printing, production, and delivery through a NASPO and PCI compliant facility that offers same day delivery turn around and maintains your postal jurisdiction origination.

UNDERSTAND. OPTIMIZE. INTEGRATE.

ITI CF understands, optimizes, and integrates all DMV services through the most secure, highest capacity facility available to increase transaction speed, customer service, and revenue without requiring additional resources or budget. ITI CF processes, prints, inserts and mails any combination of services currently delivered online, through the mail, via self-service, or at your counter from one secure location, regardless of when and where they occur. Real-time dashboards, auditing, and reporting continuously validate completion of every print and plate job to provide a complete chain of custody and make any anomalies or fraudulence immediately visible. Perhaps most important, our solution is future proof and can easily scale production without requiring any capital investment.

Recover at least 1% of revenue through real-time processing, printing and mailing that guarantees a 100% chain of custody through delivery, removes the requirement for local inventory and equipment, and requires no up front capital investment.

Decrease costs by 15% or more through a shared cost model with higher capacity, increased security, and large-scale, DMV specific equipment that could not be justified for even the largest DMV office on its own.

Decrease wait times by 30% or more through simplified issuance that allows your staff to successfully service more customers each day, provides more time to deal with complex transactions, and increases available counter space.

EXPERIENCE YOU CAN TRUST

ITI leverages over 20 years of experience in 18 states to integrate, deliver, monitor, support, and manage the inventory associated with all of your transactions so your team can focus on more important priorities. Whether the transaction is initiated online, through the mail, via self-service, or at your counter, ITI CF auto-consolidates all sources for quick and secure management and delivery. Transactions are immediately audited against your live records, fraud checked, and itiCF guarantees 100% chain of custody to the mail. All deliverables are printed in real-time on the most durable materials available, reducing the risk of fraud or theft. Best of all, as part of the DMV on Demand software platform, there is no upfront capital outlay and you only pay for what's been delivered and paid for. So, you don't have to find or create new budget.
